SURVIVOR® SR SERIES

PROVEN

The toughest truck scale made, any way you look at it

Truck Scales Endorsed by a Proven Reputation

The SURVIVOR SR Series side rail truck scale offers superior strength and longevity proven by the SURVIVOR brand. With design elements that outperform competitor brands, a SURVIVOR SR truck scale offers the best total cost of ownership in the industry.

SURVIVOR SR stands up to constant heavy loading, with more wide-flange I-beams integrated throughout the weighbridge than other leading brands, and massive, wide-flange I-beams adding rigidity to each side of the weighbridge and acting as side guides for safe truck loading.

Custom sizes and capacities are available for fitting into nearly any application's site requirements and space constraints.

Advanced Design

PE-certified Rice Lake design engineers use the most advanced Finite Element Analysis (FEA) software to examine high-stress areas and design SURVIVOR truck scales based on actual loading characteristics. Custom sizes are a standard procedure and can be manufactured to easily fit existing foundations.

G-FORCE™ SELF-CHECKING MOUNTING SYSTEM

Rice Lake's G-Force self-checking mounting system eliminates excess movement and scale wear by using 100 percent of the gravitational force from the loading action against itself, returning the scale to center without check rods or bumper bolts.

12 YEAR WARRANTY

5 YEAR WARRANTY

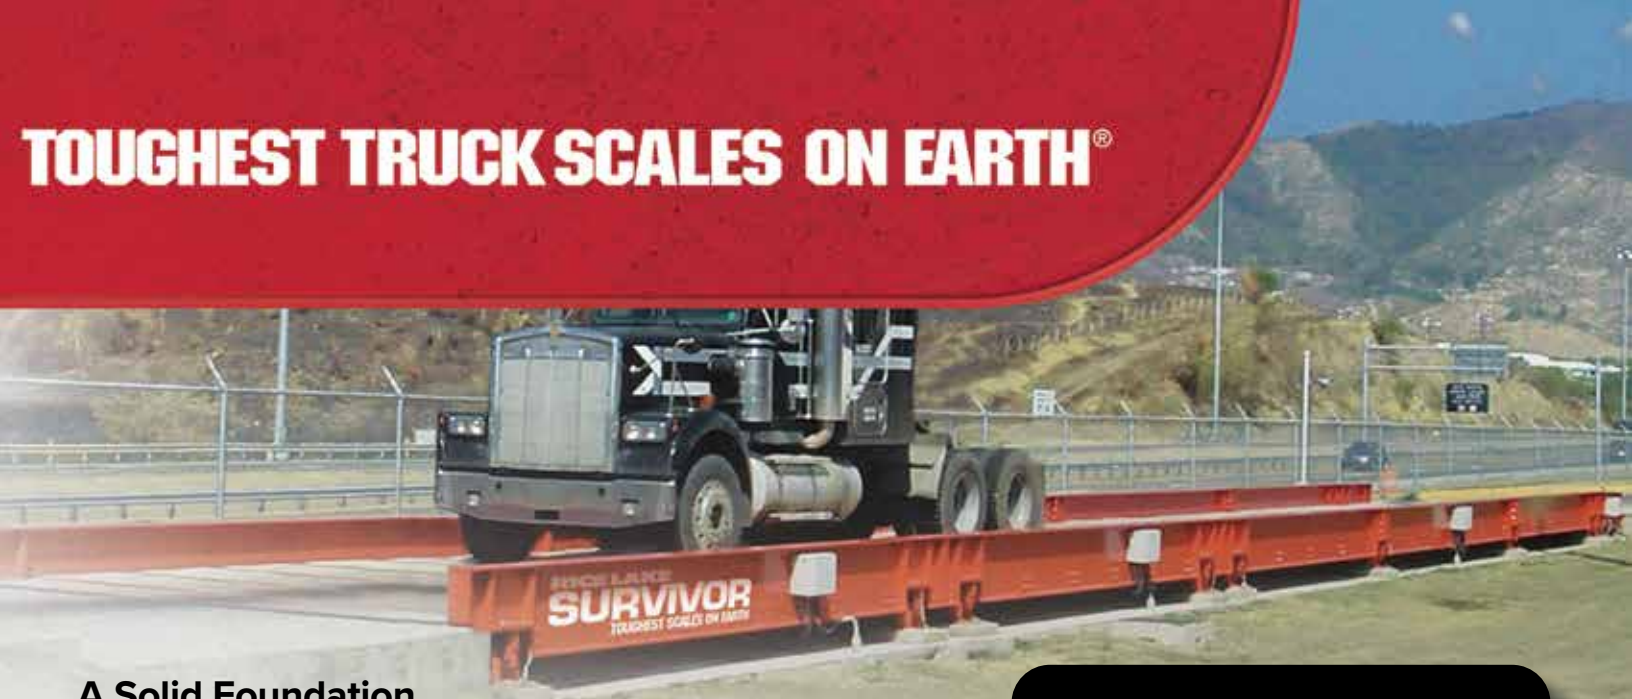
TOUGHEST TRUCK SCALES ON EARTH®

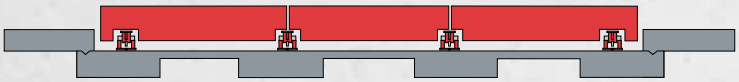


A Solid Foundation

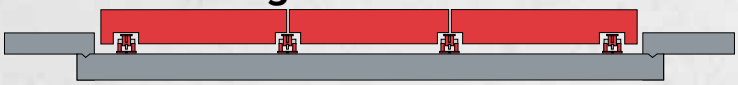
Matching the correct foundation to specific soil conditions is critical to scale performance. Factory specialists and authorized distributors will assist in specifiying the proper type for each application site. Professional, engineer-certified prints are available to ensure a quality foundation.

Additional specialized foundations available upon request.

Pier Foundation



Floating Slab Foundation



SURVIVOR® SR Series

DURABILITY

- 75,000 lb capacity load cell and mounts
- Standard 8-inch thick concrete deck

PERFORMANCE

- NTEP-Certified standard widths to 14 feet
- Weighbridge designed to accommodate 250 truck weighments per day for 25 years

CONVENIENCE

- Side rail guidance for driver, truck and load safety
- Easy access to load cells

Built tough, Start to Finish

SURVIVOR SR Series side rail truck scales go through an extensive finishing process: blast-cleaning to remove mill scale and surface imperfections, maximum coating adhesion preparation, high-solids urethane primer and paint application, and an asphalt emulsion undercoating on all non-visible steel surfaces.

SURVIVOR® SR SERIES

Automate Your Truck Scale

Build automation into truck scale operations with peripheral scale accessories, advancing safety and efficiency for heavy-capacity applications.

Boost Process Efficiency

Ultimately allowing more trucks to move over the scale, automation improves traffic flow at any site and reduces data input errors. Trucks can be preassigned an identification number and routed through the weighing site with one or multiple traffic lanes, requiring fewer stops. Transfer weight data quickly with a variety of communication options, high-speed printing and customizable software. Automation gets drivers back on the road faster—delivering more product and yielding better profits.

Automated Systems Add Safety

Rice Lake offers automated kiosks and truck scale accessories to promote safety for truck drivers and site employees. Ticketing kiosks allow drivers to check in, weigh in and out, and print tickets automatically without exiting the cab of the truck. Traffic signals, gates and remote displays can be queued to route trucks safely and quickly through the weighing process, minimizing driver time on the property.
